POWER PERFORMANCE

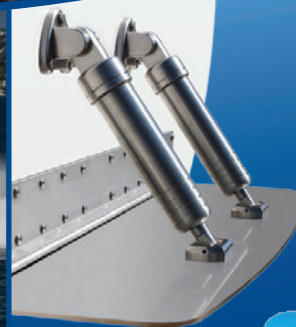

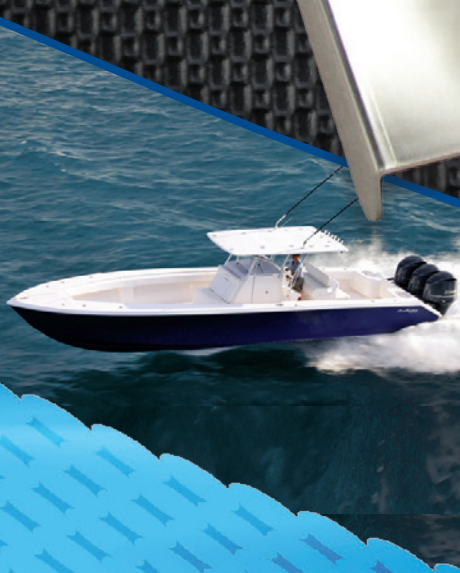

DURABILITY BEAUTY

# The Most Prestigious Trimming System in the World

## Superior Performance

Form definitely meets function when the highest quality materials combine with the **POWER OF HYDRAULICS** – the preferred technology in demanding applications.

## Unmatched Durability

The dual acting hydraulic systems lock the solid stainless steel actuators into place, securing planes while backing down or in other extreme conditions.

## Easy Installation

The XPT, BXT and SST Systems can readily be retrofitted to any vessel, and all wire lengths are customized to the vessel's specifications. The result is a hassle-free, efficient installation.

## Style and Sophistication

The Bennett Premier Line looks as good as it performs. Bennett's unique design for the Stainless Steel Actuator exhibits the beauty, strength and precision that a high-performance boat or motor yacht demands.

### At a Glance

- » For Luxury Motor Yachts, Military, Government, Sport Fishing and Commercial vessels from 9 m (30 ft) to 38 m (120 ft)
- » Single or dual stainless steel, dual acting actuators, no exposed hydraulic lines
- » Laser-cut 7-gauge, stainless steel, heavy duty trim planes
- » Systems can readily be retrofitted to any vessel
- » All systems are customized
- » Worldwide distribution to over 60 countries

For vessels from 9 m (30 ft) to 14 m (45 ft) - *Not recommended for racing boats*

## High-Performance Powerboats

## Military / Gov't

**INNOVATIVE ACCESSORY** | *Included with all Premier Line Systems*

## Electronic Indicator Control (EIC)

Attractive LED control is standard with all systems. Three features combined into one compact, surface-mounted keypad – precise manual control, trim tab indicator and auto tab retractor. Water resistant, highly accurate with variable intensity LEDs for night or day.

For vessels from 12 m (40 ft) to 21 m (70 ft)

## Luxury Motor Yachts

## Military / Gov't

## INCLUDED WITH ALL BENNETT PREMIER LINE SYSTEMS:

**Electronic Indicator Control**, with internal sensors – no wires or cables exposed to the harsh marine environment

**Auto Tab Retractor**, automatically retracts the tabs to the full-up position when ignition is turned off

**Two Compact Dual Acting Hydraulic Power Units**, each producing about 1,100 kg (2,400 pounds) of force through two actuators

**Stainless Steel Actuators**, dual acting (with no external hydraulic lines); precision machined, single or dual cylinder; no dissimilar metals; XPT and BXT actuator overall length is 305 mm (12 inches), and the SST actuator overall length is 400 mm (15 3/4 inches)

**Laser-cut 7-gauge (4.7 mm), Stainless Steel, Heavy Duty Trim Planes**

*For more specifications and access to CAD drawings, visit [www.BennettBoatBuilders.com](http://www.BennettBoatBuilders.com)*

For vessels from 18 m (60 ft) to 38 m (120 ft)

## Sport Fishing

## Luxury Motor Yachts

## INNOVATIVE ACCESSORY | *Optional on all Premier Line Systems*

### Auto Tab Control (ATC)

Plugs directly into the EIC Relay Module for an easy upgrade. Calculating more than a thousand attitude readings per second, the ATC interacts with the XPT, BXT or SST System to automatically monitor and maintain the optimum cruising attitude.

POWER PERFORMANCE

*Premier Line*

DURABILITY BEAUTY

**The Bennett Premier Line of XPT, BXT and SST Systems** is made for Motor Yachts, Military/Patrol and Sport Fishing vessels that face the most challenging conditions on the water.

### **Sophisticated Systems for Extraordinary Vessels**

The Bennett Premier Line is the result of more than 50 years of experience and over 1 million trim plane systems produced. No other company knows more about designing durable trim plane systems that are unmatched in strength and reliability.

## **EXPERIENCE THE BENNETT ADVANTAGE**

**THE POWER OF HYDRAULICS • THE STRENGTH OF STAINLESS STEEL  
THE RELIABILITY OF BENNETT**
