

SLT

Self-Leveling Tabs
For Smaller Boats

Instantly improve your boat's performance with Bennett's durable, stand-alone, Self-Leveling Tabs.

No Pump or Controls Required

Without the need of a pump or electronic controls, wiring or tubing, there's nothing required on the inside of the boat. An affordable, yet simple and effective trimming solution.

Installs in Minutes

No template needed! Change the position of the actuator with adjustable mounting options on the trim tab.

Durable and Dependable

Utilizes the same high-quality, proven materials and superior design used in Bennett standard systems for more than 50 years.

SLT10
16' Boats & Up

SLT6
Boats Up To 16'

Small Price Tag, Big Benefits

- Plane at lower speeds
- Improve fuel efficiency
- Reduce pounding
- Improve your hole shot
- Eliminate porpoising
- Reduce engine laboring
- Eliminate chine walking
- Easy Installation

Get Bennett on Board and Enjoy the Ride

SLT

Self-Leveling Tabs
For Smaller Boats

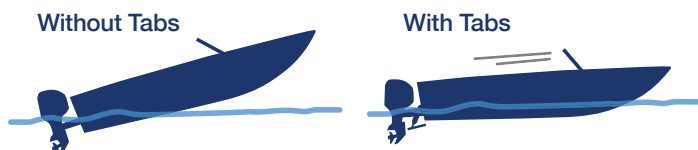

Affordable and simple. Instantly boost performance and improve your ride.

How the SLT works

The SLT reacts instantly to boat speed and water pressure by adding trim when it's needed. At slower speeds, when the boat is trying to get on plane, the actuators hold the trim tabs down, which lifts the stern and simultaneously puts the boat at planing attitude. On plane, and as the boat's speed increases, water pressure pushes the tabs up. You get a better ride while the SLT does all the work.

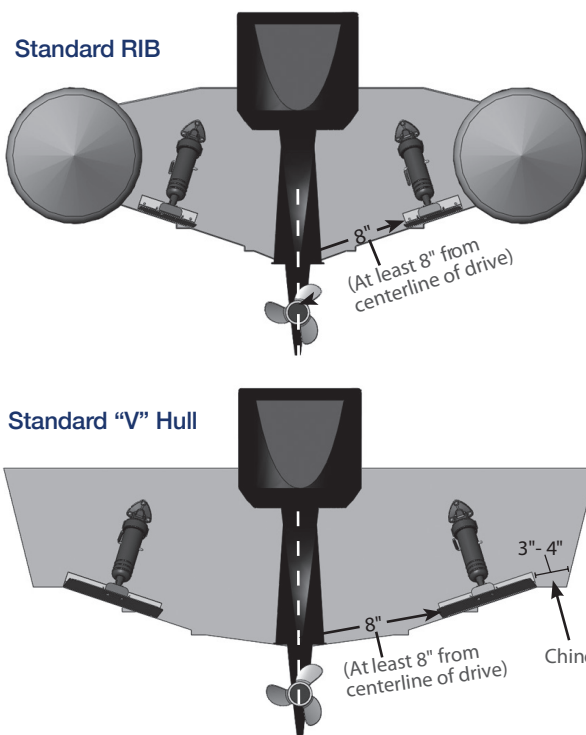

If you have a small boat, you may not need Bennett's adjustable hydraulic trim tab system. The Bennett SLT can meet your needs by giving you a better ride at a fraction of the price. It's a value that can't be beat — a quality, durable system that's quick and easy to install and backed by the best customer service you will experience anywhere.

SLT is Great For

- Inflatables
- Small Tenders
- Ribs
- Flats
- Bowriders
- Ski
- Skiffs
- Fish
- Day Cruisers
- Deck
